

Turbo Mixer®

Product Description

The TURBO mixer is an innovative improvement of the standard static mixers. Patented by Chemfix, this mixer dispenses any chemical anchor cartridge system using less force, with better mixing and less waste than any other mixer currently available.

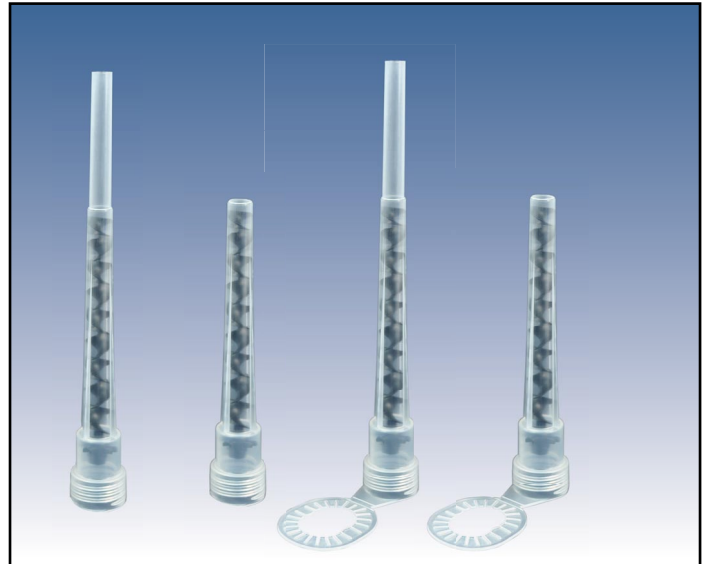

Better mixing is ensured by a moulding positioned in the neck of the mixer that pre-mixes the resin and hardener.

Key Features

- 165ml with hanger Ideal for “point of sale” & DIY sales.
- Less extrusion force required compared to a standard mixer.
- Faster extrusion than with a normal mixer.
- Less material is wasted after extrusion.
- Suitable for all cartridges with all resins.

Hanger versions suitable for 165ml, 380ml, 410ml also 345ml & 400ml side by side cartridges. Suitable for use with all resin types.

Available in four versions - 135mm or 190mm with or without hanger

300% faster to extrude than a standard mixer...

The turbo mixer contains this unique mixing valve which creates a vortex that gives more mixing for less force.
